In 2011, Michelin and the FIA signed a partnership agreement which fostered the international Golden Rules campaign as part of the FIA Action for Road Safety.

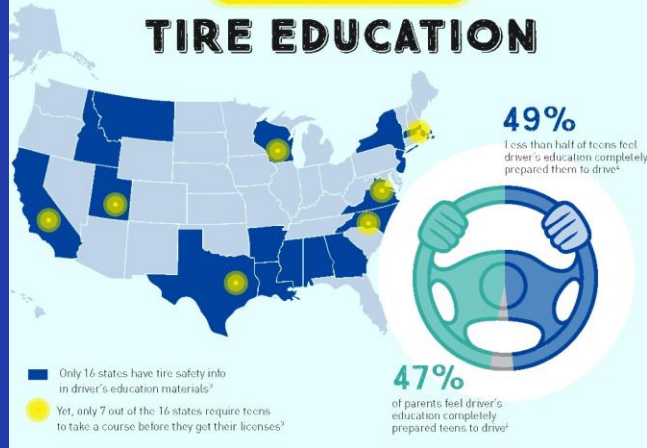

What Teen Drivers Need to Know...

BEYOND THE DRIVING TEST

Automobile accidents are the No. 1 killer of teens in the U.S., with 5,000 deaths each year. What's more, of the 2.2 million accidents per year among inexperienced drivers, 12 percent can be attributed to tire-related issues, such as insufficient tread or pressure¹. Even so, few driver's education programs offer instruction on tire maintenance and tire safety.

ROAD READINESS

GLOVE BOX GUIDE

When it comes to road safety, you can't control other drivers or road conditions, but one thing you can control is proper maintenance to your vehicle and tires. To help you remember what to check and when, Michelin and the FIA have put together 5 simple tips to help you stay safe on the road. Keep this handy tip sheet in your glove box so you can refer to it when you need it!

AT LEAST ONCE A MONTH:

1 CHECK YOUR TREAD

- ☐ Hold a penny with Abraham Lincoln's body between your thumb and forefinger
- ☐ Place Lincoln's head first into the deepest looking groove
- ☐ Can you see all of his head? If yes, your tires are too worn – don't drive on them and get them replaced!

2 CHECK YOUR TIRE PRESSURE

- ☐ Buy a tire pressure gauge, if you don't have one already
- ☐ Open your car door and on the inside jamb you should see a sticker - take a picture on your smartphone of the number that says "PSI" (the measurement for tire pressure)
- ☐ Use the pressure gauge to check your tires (make sure you check when they are cold)
- ☐ Compare the number on the gauge to the number you wrote down. If above, let air out of your tires. If below, inflate until the numbers match

Beyond the Driving Test

Automatic accidents are the No. 1 killer of teens in America, with 5,000 deaths each year. What's more, of the 2.3 million accidents per year involving teen drivers, 90 percent can be attributed to inexperience. With an in-depth level of instruction in the classroom and safety.

Because many of these accidents are preventable, Michelin and FIA have joined together to launch a new campaign, **Beyond the Driving Test**, to raise awareness of driver education and safety. This will make available resources designed to initiate conversation between parents and teens, and provide teens drivers and their peers. The two organizations will also be working with national groups and state organizations to move the goal of having all 50 states include some form of live safety instruction in their mandatory driver's education curricula by 2020.
